Emerging from the Jazz department of the “Conservatoire de Musique de la Ville de Luxembourg”, the Royal Conservatory of Bruxelles as well as the New York Jazz scene, these young musicians formed this Quintet to pursue their common passion- namely Jazz.

Thus, this Quintet, striving for a more intimate and sentimental means of expression, created a vocal Jazz ensemble enabling them to interpret the popular music of the 20th century. The key being not only to interpret, but mainly to re-interpret the standards by adapting them to the music of our time. This innovative process does not exclude the tradition of the great American songwriters. This geographically and culturally diverse ensemble includes artists from Ireland, Luxembourg, France and Belgium, with Luxembourg as a pivot.

The encounter of an exceptional voice and a distinctive rhythm section pays homage to vocal Jazz, and creates a universe of magical sounds by merging the timbre of the voice - the vibraphone as well as the guitar whilst employing the most universal language known to man: Music.

Their latest project has been the recording of their first Jazz Cd in January 2004 at the Waltzing-Parke Studios.
